DETAILED ACTION

Claim 9 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim may not depend from a multiple dependent claim, e.g. claim 8, directly, and claim 7, through claim 8. See MPEP § 608.01(n). Accordingly, the claim 9 has not been further treated on the merits.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, 10-17, drawn to a method for transfer of genetic material to cells in culture using an ovine atadenoviral vector.

Group II, claim(s) 1-4, 6-8, 10-13, 14-17, drawn to a method for transfer of genetic material to cells in culture using an ovine mastadenoviral vector.

Group III, claim(s) 1-4, 6-8, 10-13, 14-17, drawn to a method for transfer of genetic material to cells in culture using a bovine atadenoviral vector.

Group IV, claim(s) 1-4, 6-8, 10-13, 14-17, drawn to a method for transfer of genetic material to cells in culture using a bovine mastadenoviral vector.

Group V, claim(s) 1, 2, 6-8, 10, 11, 15-17, drawn to a method for transfer of genetic material to cells in culture using a bird adenoviral vector.

Group VI, claim(s) 1-8, drawn to a method for transfer of genetic material to muscle or tumor cells in a mammal using an ovine atadenoviral vector.

Group VII, claim(s) 1-4, 6-8, drawn to a method for transfer of genetic material to muscle or tumor cells in a mammal using an ovine mastadenoviral vector.

Group VIII, claim(s) 1-4, 6-8, drawn to a method for transfer of genetic material to muscle or tumor cells in a mammal using a bovine atadenoviral vector.

Group IX, claim(s) 1-4, 6-8, drawn to a method for transfer of genetic material to muscle or tumor cells in a mammal using a bovine mastadenoviral vector.

Group X, claim(s) 1, 2, 6-8, drawn to a method for transfer of genetic material to muscle or tumor cells in a mammal using a bird adenoviral vector.

The inventions listed as Groups I-X do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I-V and groups VI-X are directed to different methods requiring different products. Groups I-V are directed to the production of recombinant cells in culture, whereas Groups V-X are directed to transferring genetic material into a mammal. The only technical feature linking Groups I-V and VI-X is the use of a non-human adenoviral vector. Each of Groups I-V or VI-X involve use of adenoviral vectors based upon different non-human animal

Art Unit: 1632

hosts or different types of adenovirus. The only link between these inventions is that the vectors are non-human adenoviral vectors.

However, the use of non-human adenoviral vectors for transfer of genetic material either to cells in culture or into mammals is not a special technical feature. See for example: Haddada et al., US 6,294,377 (PTO-892, 3/18/03); and Mittal et al., US 5,820,868; Both, G.W. WO 97/06826; Both et al., WO 96/03508; Hofmann et al.; J. Virol. 73 (8): 6930-6936; *inter alia* (PTO-1449, 4/5/02); and the International Preliminary Examination Report filed with the instant application.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Drawings

The drawings were received on 7/15/03. These drawings are unacceptable for the reasons set forth on the attached PTO-948. New formal drawings are required in this application. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to this Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
